

MBA
(SEM III) THEORY EXAMINATION 2022-23
OPERATIONS PLANNING & CONTROL

Time: 3 Hours**Total Marks: 100****Note:** Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt all questions in brief. 2 x 10 = 20

- (a) Define operations planning.
- (b) Point out the quantitative techniques of forecasting.
- (c) What is batch manufacturing system?
- (d) What do you understand by routing?
- (e) What is over processing waste?
- (f) Define lean manufacturing.
- (g) What is system feedback?
- (h) What are the advantages of two bin system?
- (i) Define MRP-II
- (j) Explain control rooms.

SECTION B

2. Attempt any three of the following: 10x3 = 30

- (a) Describe roles and responsibilities of PPC manager.
- (b) What is routing procedure? Explain materials flow patterns.
- (c) Explain capital-intensive aggregate planning.
- (d) Discuss 5S techniques of eliminating wastages.
- (e) What are Gantt charts in production control and why these are used in production?

SECTION C

3. Attempt any one part of the following: 10x1 = 10

- (a) Discuss quantitative techniques of forecasting.
- (b) Elaborate the objectives of Production Planning and Control.

4. Attempt any one part of the following: 10x1 = 10

- (a) Compare job production and mass production along with its advantages and disadvantages.
- (b) Define capacity planning. Explain the need and classification of capacity planning.

5. Attempt any one part of the following: 10x1 = 10

- (a) What are the key differences between level strategy and chase strategy in aggregate production planning formulation?

(b) Explain master production schedule and how these are prepared?

6. Attempt any *one* part of the following:

10x1 = 10

- (a) Explain various types of wastes.
- (b) Discuss lean process to minimize the wastages in production.

7. Attempt any *one* part of the following:

10x1 = 10

- (a) Discuss strategies for corrective actions in production control.
- (b) Explain various tools used in production control systems.
