

MBA
(SEM IV) THEORY EXAMINATION 2022-23
BUSINESS DATA WAREHOUSING & DATA MINING

Time: 3 Hours

Total Marks: 100

Note: Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt all questions in brief. 2 x 10 = 20

- a. What is a Data Warehouse? How is it differs from DBMS.
- b. Define dimensionality reduction.
- c. How are meta rules useful in Data Mining?
- d. What is the use of Multi dimensional view?
- e. What are Frequent Patterns?
- f. Define Gain ratio of an attribute.
- g. What are the objectives of Clustering?
- h. What is Decision tree?
- i. Define Clustering of Data.
- j. What are the parameters for selecting right data mining technique?

SECTION B

2. Attempt any three of the following: 10 x 3 = 30

- a. Give the examples for defining Star, Snowflake and Fact Constellation schemas.
- b. Compare the Online Transaction Processing with Online Analytical Processing.
- c. Explain about various Data Mining Tasks with appropriate examples.
- d. Explain the potential performance problems with star schema. Give examples.
- e. Explain the current Trends in Data Mining.

SECTION C

3. Attempt any one part of the following: 10 x 1 = 10

- a. Discuss about three-tier Data Warehouse Architecture.
- b. Explain the ETL process in details.

4. Attempt any one part of the following: 10 x 1 = 10

- a. What are the various types of OLAP servers? Explain.
- b. Describe the measures of Multidimensional Data Model.

5. Attempt any one part of the following: 10 x 1 = 10

- a. Describe the process of Data Cleaning.
- b. Differentiate between Data Processing and Data Mining.

6. Attempt any one part of the following: 10 x 1 = 10

- a. Describe the Data Generalization and its two basic approaches.
- b. Describe the Statistical-Based Algorithms.

7. Attempt any one part of the following: 10 x 1 = 10

- a. Explain in details Hierarchical Cluster Analysis.
- b. Describe the Clustering and its applications of Clustering in different fields.
