

Paper ID : 261982

Printed Page: 1 of 2

Subject Code:BP201T

Roll No:

B.PHARM.**(SEM. II) THEORY EXAMINATION 2025-26****HUMAN ANATOMY AND PHYSIOLOGY II****TIME: 3 HRS****M.MARKS: 75**

Note: Attempt all Sections. If require any missing data; then choose suitably.

SECTION A**1. Attempt all questions in brief.****10 x 2 = 20**

a.	Describe the functions of spinal cord.
b.	What is ATP and why is it called the energy currency of the cell?
c.	What is cerebrospinal fluid? Mention its functions.
d.	Explain the mechanism of nerve impulse conduction.
e.	Explain the role of parathyroid hormone in calcium homeostasis.
f.	How does the Renin-Angiotensin System regulate blood pressure?
g.	Differentiate between peptide and steroid hormone.
h.	Differentiate between spermatogenesis and oogenesis.
i.	Explain the role of negative feedback in hormone regulation.
j.	Differentiate between tidal volume and vital capacity.

SECTION B**2. Attempt any two parts of the following:****2 x 10 = 20**

a.	Discuss the classification of sensory receptors. Explain the structure and physiological functions of different types of receptors involved in sensory perception.
b.	Describe the structure of the pituitary gland and its role in regulating other endocrine glands. Include the hormones secreted by the anterior and posterior pituitary.
c.	Write the anatomy and physiology of Male or Female reproductive system with well labeled diagram.

SECTION C**3. Attempt any five parts of the following:****5 x 7 = 35**

a.	Draw a well labeled diagram of brain. Explain the different parts of human brain in detail with their functions?
b.	Discuss in details about artificial respiration, and resuscitation methods.

B.PHARM.

(SEM. II) THEORY EXAMINATION 2025-26

HUMAN ANATOMY AND PHYSIOLOGY II

TIME: 3 HRS

M.MARKS: 75

c.	Explain the structure of nephron and describe the physiology of urine formation in detail.
d.	Write about the synthesis, storage, secretion and regulation of thyroid hormone.
e.	Explain the regulation of acid secretion in the stomach through the parasympathetic nervous system.
f.	Describe the structure of DNA and explain transcription and translation.
g.	Elaborate in detail about physiology of menstruation with suitable diagram.
