B PHARM
(SEM VIII) THEORY EXAMINATION 2022-23
CELL AND MOLECULAR BIOLOGY

Time: 3 Hours ***Total Marks: 75***

Note: Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt *all* questions in brief. **2 x 10 = 20**

(a) Distinguish between prokaryotes and eukaryotes.

(b) Give brief introduction of molecular biology.

(c) Write the phases of the cell cycle.

(d) Give a suitable example to illustrate how RNA works.

(e) Describe cell cycle analysis.

(f) Distinguish between mitosis and meiosis.

(g) What do you mean by positive control?

(h) What are the types of DNA?

(i) List of different cell signaling receptors.

(j) Define protein and amino acids

SECTION B

2. Attempt any *two* parts of the following: **10 x 2= 20**

(a) Give an explanation of the transgenic and genomic analysis

(b) Describe the characteristics of the cell membrane and the applications of cellular and molecular biology.

(c) Describe the broad picture of signaling pathways.

SECTION C

3. Attempt any *five* parts of the following: **7 x 5 = 35**

(a) What different cellular activities are there? Describe each checkpoint.

(b) What about the translation and transcription?

(c) How does protein kinase function?

(d) Describe the importance of protein synthesis and the positive control.

(e) Review the protein pathway's regularities.

(f) Describe the JACK-STAT signaling system.

(g) Discuss DNA and the transfer of molecular information.
