B PHARM

(SEM IV) THEORY EXAMINATION 2022-23

MEDICINAL CHEMISTRY-I

Time: 3 Hours ***Total Marks: 75***

Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt *all* questions in brief. 10 x 2 = 20

a) Discuss the effect of solubility in relation to biological action.

b) Name the factors affecting drug metabolism.

c) Name adrenergic receptors and give their distribution.

d) Give the synthesis of Tolazoline.

e) Discuss the biosynthesis of acetylcholine.

f) What is cholinesterase reactivator? Give example.

g) Name and give the structure of any two drugs having phenothiazine nucleus.

h) What are antipsychotics?

i) Give the structure of any two inhalational anaesthetics.

j) What are narcotic antagonists? Give examples.

SECTION B

2. Attempt any *two* parts of the following: 2 x 10 = 20

a) Discuss physicochemical properties in relation to drug action.

b) Classify sympathomimetic agents and discuss their SAR.

c) Compare sedatives and hypnotics. Write the mechanism of action and synthesis of diazepam and barbital.

SECTION C

3. Attempt any *five* parts of the following: 7 x 5 = 35

a) Compare Phase I and Phase II metabolism with suitable examples.

b) Outline the synthesis of Propranolol. Discuss SAR of beta blockers.

c) Illustrate the classification of parasympathomimetic agents.

d) Give the mechanism of action, synthesis and uses of:

(i) Chlorpromazine HCl (ii) Phenytoin.

e) Discuss in detail classification of anticonvulsants. Give synthesis of ethosuximide.

f) Illustrate in detail SAR of Morphine analogues.

g) Outline the synthesis and uses of

(i) Ibuprofen (ii) Ketamine hydrochloride
