B. PHARM
(SEM V) THEORY EXAMINATION 2022-23
PHARMACEUTICS-VI (PHARMACEUTICAL TECHNOLOGY-I)

Time: 3 Hours ***Total Marks: 70***

Note: Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt *all* questions in brief. 2*7 = 14

a. Define Sterile water for injection.
b. Write full form of ICH.
c. Write name of two hydrocarbon propellants used in aerosols
d. Enlist the various methods of skin permeation.
e. Define the term veterinary dosage form with suitable examples
f. Define in-situ gels.
g. What is the principle of LAL test for detecting pyrogens?

SECTION B

2. Attempt any *three* of the following: 7*3 = 21

a. Explain the term suppositories and various bases used for preparation.
b. Elaborate on the ICH guidelines for stability testing of pharmaceutical products.
c. Discuss the significance of polymorphism with respect to preformulation studies.
d. Illustrate the various ingredients added during formulation of suspensions?
e. Explain in detail about the prefilling treatment carried out during production of parenterals

SECTION C

3. Attempt any *one* part of the following: 7*1 = 7

a. Explain the significance of pka and pH in preformulation studies?
b. Discuss in brief about dissolution study.

4. Attempt any *one* part of the following: 7*1 = 7

a. Discuss advantages of emulsion along with various instability problems associated.
b. Write note on- (i) Multiple Emulsion (ii) Nanosuspension

5. Attempt any *one* part of the following: 7*1 = 7

a. Elaborate on the manufacturing of suppositories on small & large scale.
b. Classify semisolid dosage forms and explain the methods of preparation of a clear gel.
