M. PHARM
(SEM I) THEORY EXAMINATION 2022-23
ADVANCED PHARMACOLOGY-I

Time: 3 Hours**Total Marks: 75****Note:** Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt all questions in brief.**10 x 2 = 20**

- (a) Define protein binding with its significance
- (b) Explain the receptors with examples.
- (c) Discuss the Cot ransmission with examples.
- (d) Write the symptoms and treatment of organophosphorus poisoning.
- (e) Differentiate between general and local anesthetics with examples.
- (f) Write the mechanism of action of lithium carbonate.
- (g) Define the hematinics with examples.
- (h) Infer the uses of anticoagulants.
- (i) Describe the mechanism of prostaglandins.
- (j) Demonstrate the uses of opioid autocoids.

SECTION B

2. Attempt any two parts of the following:**2 x 10 = 20**

- (a) Classify the different types of receptors with emphasis on G-protein coupled receptors.
- (b) Classify the antihypertensive drugs and write the MOA, therapeutic uses and adverse effects of ACE inhibitors.
- (c) Discuss angina pectoris. Classify antianginal drugs, explain the MOA of nitroglycerine.

SECTION C

3. Attempt any five parts of the following:**5 x 7 = 35**

- (a) Illustrate the pharmacological treatment of Alzheimer's disease with complete pharmacology of cholinesterase inhibitors.
- (b) Describe the biotransformation Phase I reactions of drugs with examples.
- (c) Write a descriptive note on narcotic analgesics &also discuss about treatment of morphine poisoning.
- (d) Classify the anti-hyperlipidemic drugs with complete pharmacology of statins.
- (e) Assess the physiological and pathological role of serotonin.
- (f) Classify antiepileptics. Explain pharmacology of phenytoin.
- (g) Summarize the pharmacological treatment of Congestive heart failure.
