

Paper ID : 262068

Printed Page: 1 of 1

Subject Code:BP103T

Roll No:

BPHARM
(SEM. I) THEORY EXAMINATION 2025-26
PHARMACEUTICS-I

TIME: 3 HRS**M.MARKS: 75****Note:** 1. Attempt all Sections. If require any missing data; then choose suitably.

2. Any special paper specific instruction.

SECTION A**1. Attempt all questions in brief.****10 x 2 = 20**

a.	Define Pharmacopoeia and mention any two official Pharmacopoeias.
b.	Define Posology. State any two factors affecting dose.
c.	Differentiate between Imperial and Metric systems of weights and measures.
d.	State the principle of geometric dilution.
e.	Define Elixirs and Syrups.
f.	Distinguish between flocculated and deflocculated suspensions.
g.	Mention the types of suppository bases.
h.	Classify pharmaceutical incompatibilities with one example each.
i.	Define ointments and gels.
j.	Name any four excipients used in semi-solid dosage forms.

SECTION B**2. Attempt any two parts of the following:****2 x 10 = 20**

a.	A drug is prescribed for a child aged 8 years. The usual adult dose of the drug is 250 mg. a) Calculate the child dose using Young's formula. b) Calculate the child dose using Dilling's formula. c) Calculate the child dose using Clark's formula, given that the child's weight is 25 kg. d) Compare the three calculated doses and state which method is more reliable and why.
b.	Explain pharmaceutical calculations involving: (i) Percentage solutions (ii) Allegation method (iii) Proof spirit (iv) Isotonic solutions.
c.	Explain pharmaceutical incompatibilities. Discuss physical, chemical and therapeutic incompatibilities with suitable examples.

SECTION C**3. Attempt any five parts of the following:****7 x 5 = 35**

a.	Describe the history and development of the pharmacy profession in India. Discuss pharmacy as a career.
b.	Explain the classification, advantages and disadvantages of powders. Add a note on effervescent and hygroscopic powders.
c.	Discuss various solubility enhancement techniques used in formulation of liquid dosage forms.
d.	Define suspensions. Explain stability problems associated with suspensions and methods used to overcome them.
e.	Define emulsions. Discuss classification, emulsifying agents and tests used for identification of emulsion type.
f.	Explain the types of suppository bases, methods of preparation and evaluation parameters of suppositories.
g.	Discuss the mechanism and factors influencing dermal penetration of drugs. Add a note on evaluation of semi-solid dosage forms.
