

Roll No:

MBA-INT
(SEM. IV) THEORY EXAMINATION 2025-26
DESIGN THINKING & INNOVATION

TIME: 3 HRS

M.MARKS: 70

Note: Attempt all Sections. In case of any missing data; choose suitably.

SECTION A

1. Attempt *all* questions in brief.

02 x 7 = 14

Q no.	Question	CO	Level
a.	Briefly state the role of innovation and creativity in organizations.	1	K1
b.	Briefly explain what is meant by having a "mindset for design thinking"	1	K1
c.	How is "storytelling" utilized as a method in the Define phase.	2	K2
d.	Briefly explain how brainstorming is used to finalize problem statements	3	K1
e.	Define the purpose of peer observation during the Empathize phase.	2	K1
f.	List any two general types of prototypes used in the Prototype phase.	4	K1
g.	What is the purpose of providing a Solution Overview in the Test phase?	5	K2

SECTION B

2. Attempt any *three* of the following:

07 x 3 = 21

a.	Differentiate in detail between traditional problem-solving approaches and design thinking. Discuss the concept of "wicked problems" in this context	1	K2
b.	Explain the application of the "Ask & Why" and "5W+H" questioning techniques. Demonstrate how these tools can be applied to uncover the root causes of a complex user problem.	2	K3
c.	Explain the application of the 2x2 matrix as an ideation tool. How does analyzing ideas through this specific framework help teams compare and select the most viable solutions?	3	K3,K4
d.	Why is the Prototype phase important in Design Thinking? Discuss the different types of prototypes and explain how choosing the right type helps make a solution successful	4	K5
e.	Why is the Test Phase critical in Design Thinking? Explain how to create and use a feedback capture grid to organize and evaluate user responses.	5	K5,K6

SECTION 60

3. Attempt any *one* part of the following:

07 x 1 = 07

a.	Describe the complete Process of Design Thinking. How is implementing this process utilized in driving innovation.	1	K2
b.	Compare and contrast engineering design with design thinking. Provide a detailed explanation of the differences between the two disciplines.	1	K2

4. Attempt any *one* part of the following:

07 x 1 = 07

4. Attempt any one part of the following.		
a.	Analyze the significance of the Empathize phase in Design Thinking. How does the application of an Empathy Map help designers gain deeper, actionable insights into user needs?	2 K4
b.	What is a Critical Items Diagram? Analyze how this tool is applied during the Define phase to prioritize issues and structure the final problem statement.	2 K4

Paper ID : 261602

Printed Page: 2 of 2

Subject Code:BMBA1404

(SEM. IV) THEORY EXAMINATION 2025-26
DESIGN THINKING & INNOVATION

TIME: 3 HRS

M.MARKS: 70

5. Attempt any one part of the following:		07 x 1 = 07	
a.	Describe the 6-3-5 method of ideation in detail. Apply this method to a hypothetical team scenario to demonstrate how it systematically generates a high volume of innovative ideas.	3	K3
b.	Analyze the NABC framework. How is this method used to critically evaluate, formulate, and refine generated ideas to ensure they address user needs effectively?	3	K4
6. Attempt any one part of the following:		07 x 1 = 07	
a.	What is an exploration map and why is it used? Show how to apply this tool to a sample design problem to help improve a prototype.	4	K3
b.	Define a Minimum Viable Product (MVP). Evaluate why an MVP is important and how it helps teams learn from users while reducing risks	4	K5
7. Attempt any one part of the following:		07 x 1 = 07	
a.	What is A/B testing? Evaluate how comparing two versions of a prototype helps teams decide which design works better for the users	5	K5
b.	What is a roadmap for implementation? Design a basic roadmap that shows the step-by-step process of launching a newly tested product into the real world.	5	K6
