

Paper ID : 261178

Printed Page: 1 of

Subject Code:BBA404

Roll No:

BBA
(SEM. II) THEORY EXAMINATION 2025-26
DESIGN THINKING & INNOVATION

TIME: 3 HRS

M.MARKS: 70

Note: Attempt all Sections. In case of any missing data; choose suitably.

SECTION A

1. Attempt all questions in brief.

02 x 7 = 14

Q no.	Question	CO	Level
a.	Define the term "wicked problems" in the context of design thinking	1	K1
b.	List any two methods or tools used specifically in the Empathize phase.	2	K1
c.	Are the 5 Why or 5W+H questions used in the Empathize phase or the Define phase?	2	K1
d.	Name two common methods for ideation	3	K1
e.	Name two methods used for prototyping,	4	K1
f.	Contrast the mindset required for engineering design with the mindset required for design thinking	1	K4
g.	What is a feedback capture grid and how is it used during testing	5	K1

SECTION B

2. Attempt any three of the following:

07 x 3 = 21

Q no.	Question	CO	Level
a.	Explain the complete Process of Design Thinking. Discuss how you would practically implement this process to drive innovation within a specific project or organizational setting?	1	K2&k3
b.	How did design thinking start and evolve over time? Explain how design thinking is different from traditional problem-solving.	2	K2
c.	What is a 2x2 matrix? Explain how you can use this tool to organize, compare, and select the best ideas during the Ideate phase.	3	K4
d.	What are the different types of prototypes used in design thinking? Explain why building a prototype is a necessary step before moving on to the final testing phase.	4	K2
e.	Describe the method of A/B testing. How does conducting and analyzing this type of test help a design team evaluate which version of their solution works best in the real world.	5	K4

SECTION C

3. Attempt any one part of the following:

07 x 1 = 07

Q no.	Question	CO	Level
a.	Evaluate the role of innovation and creativity within organizations. How do team environments influence creativity, and why is fostering this creative mindset critical for business success and product innovation.	1	K5
b.	Differentiate between traditional problem-solving approaches and the design thinking approach.	1	K4

BBA
(SEM. II) THEORY EXAMINATION 2025-26
DESIGN THINKING & INNOVATION

TIME: 3 HRS

M.MARKS: 70

4. Attempt any one part of the following:**07 x 1 = 07**

Q no.	Question	CO	Level
a.	Why are innovation and creativity so important for a business? Discuss how building a creative team environment helps the design thinking process succeed	2	K5
b.	Imagine a company that only uses traditional problem-solving. Create a simple plan to help them switch to a design thinking mindset. How would this new mindset help them solve "wicked problems"	2	K6

5. Attempt any one part of the following:**07 x 1 = 07**

Q no.	Question	CO	Level
a.	Describe the 6-3-5 method step-by-step. How does this specific tool help teams formulate and generate a large number of ideas quickly.	3	K3
b.	Imagine you have just finalized your problem statement. Create a simple plan showing how you would use a combination of brainstorming, the 6-3-5 method, and a 2x2 matrix to find and organize the best possible solution for your project.	3	K6

6. Attempt any one part of the following:**07 x 1 = 07**

Q no.	Question	CO	Level
a.	What does Minimum Viable Product (MVP) mean? Describe how a company can use an MVP to test a new product idea with real users without spending too much time or money.	4	K3
b.	Explain the concept of focused experiments in the prototype phase. How do these experiments help you validate your potential solutions and find problems early on?	4	K4

7. Attempt any one part of the following:**07 x 1 = 07**

Q no.	Question	CO	Level
a.	What is a Solution Overview? Detail the key elements you must include when you create a pitch to successfully present and sell your final idea to stakeholders or investors	5	K6
b.	Why is it necessary to have a plan for scaling up after a successful test? Explain how to prepare a clear and effective road map for implementation to ensure your project grows smoothly over time	5	K3
