

Roll No: _____

MBA-INT
(SEM I) THEORY EXAMINATION 2024-25
IT-APPLICATION-1

TIME: 3 HRS

M.MARKS: 70

Note: Attempt all Sections. In case of any missing data; choose suitably.

SECTION A

1. Attempt *all* questions in brief.

2 x 07 = 14

Q no.	Question	CO	Level
a.	Explain the role of Artificial Intelligence in business intelligence.	1	K2
b.	Explain how ML algorithms can be used to identify patterns.	1	K2
c.	List the steps involved in inserting and formatting a table in MS Word.	2	K4
d.	Analyze the process of inserting pictures and videos into MS Word documents.	2	K4
e.	Propose the process of creating a slide show in PowerPoint.	3	K6
f.	Examine the customization options available in Excel.	4	K4,K2
g.	Explain the process of removing duplicate records in Excel.	5	K5

SECTION B

2. Attempt any *three* of the following:

7 x 3 = 21

Q no.	Question	CO	Level
a.	Explain the difference between data and information, and discuss how business intelligence tools utilize data to generate actionable insights. Provide examples of how organizations leverage data to improve decision-making.	1	K2
b.	Analyze the importance of printing and protecting documents in MS Word. Explain the options available for document security, such as password protection, and evaluate their relevance in maintaining confidentiality and preventing unauthorized access.	1	K4
c.	Discuss the importance of customizing PowerPoint presentations for different audiences. Explain how adjusting content, design, and delivery can improve the effectiveness of a presentation in business meetings, conferences, or training sessions.	3	K6
d.	Outline the characteristics of a spreadsheet and explain how Excel's structure supports data organization and analysis. Discuss the advantages of using Excel for managing large datasets in business environments.	4	K4, K2
e.	Evaluate the process of filtering records in Excel. Explain how filters help users focus on specific subsets of data and evaluate their effectiveness in analyzing large datasets.	5	K5

SECTION C

3. Attempt any *one* part of the following:

07 x 1 = 07

Q no.	Question	CO	Level
a.	Demonstrate the fundamental differences between system software and application software. Explain their roles in supporting business intelligence tasks, and evaluate how they interact with each other in a business environment.	1	K2
b.	Illustrate the concept of a database and data warehouse. Compare their functions and explain how they are used in storing, organizing, and retrieving large amounts of data for business intelligence purposes.	1	K2

M.MARKS: 70

4. Attempt any *one* part of the following:

07 x 1 = 07

Q no.	Question	CO	Level
a.	Classify the salient features of MS Word and explain how they contribute to the creation of professional documents. Discuss how these features improve productivity and document formatting in business environments.	2	K4
b.	Categorize how to use templates in MS Word to streamline document creation. Explain the advantages of using templates for consistency and efficiency, and evaluate how they can be customized to meet specific business needs.	2	K4

5. Attempt any *one* part of the following:

07 x 1 = 07

Q no.	Question	CO	Level
a.	Describe the process of working with slides in PowerPoint, including adding, editing, and organizing slides. Discuss how the structure and flow of a presentation can influence audience retention and comprehension.	3	K6
b.	Plan the use of fonts, drawing tools, and editing options in PowerPoint. Explain how these features can be used to create visually compelling presentations and discuss their application in business contexts like marketing or training.	3	K6

<https://www.aktuonline.com>6. Attempt any *one* part of the following:

07 x 1 = 07

Q no.	Question	CO	Level
a.	Explain the process of printing and protecting worksheets in Excel. Explain the options available for customizing print settings and protecting sensitive data, and evaluate the importance of these features in business reporting.	4	K4, K2
b.	Analyze the use of operators in Excel formulas and explain how they are applied in calculations. Discuss the importance of understanding operators in creating accurate and efficient formulas for data analysis.	4	K4, K2

7. Attempt any *one* part of the following:

07 x 1 = 07

Q no.	Question	CO	Level
a.	Explain the concept of data management in Excel and discuss how it contributes to efficient data organization and analysis. Evaluate the importance of proper data management in business decision-making processes.	5	K5
b.	Interpret the process of creating an Excel table from a cell range. Explain the benefits of using tables for data organization, and discuss how tables can be converted back to a range for specific data manipulation tasks.	5	K5
