Subject Code:KMHC206

Roll No:

MBA

**(SEM. II) THEORY EXAMINATION 2025-26
EPIDEMIOLOGY AND PUBLIC HEALTH SYSTEMS**

TIME: 3 HRS

M.MARKS: 100

Note: Attempt all Sections. In case of any missing data; choose suitably.

SECTION A

1. Attempt all questions in brief.**2 x 10 = 20**

Q No.	Question	CO	Level
a.	Define the "concept of health" and list any two of its dimensions.	1	K2
b.	Briefly explain what is meant by the "spectrum of health."	1	K2
c.	Define Epidemiology and identify the three components of the epidemiological triad.	1	K1
d.	Name the basic measurements used in epidemiology for mortality and morbidity.	2	K1
e.	What are hospital infections? State their primary routes of transmission.	3	K1
f.	Briefly outline the main objectives of an infection control department.	3	K2
g.	Differentiate between the concepts of disinfection and decontamination.	4	K2
h.	Identify the key areas in a hospital where control measures for waste management are essential (e.g., wards, operation theaters).	4	K1
i.	Expand the health indicators DALYs and QALYs.	5	K1
j.	What does the Physical Quality of Life Index (PQLI) measure?	5	K2

SECTION B

2. Attempt any three of the following:**10 x 3 = 30**

Q No.	Question	CO	Level
a.	Explain the various dimensions and determinants of health. Discuss the different levels of prevention of disease with suitable examples.	1	K2
b.	Discuss the purpose of "Screening & survey" in public health. Highlight its importance concerning the prevention of "Common diseases in India."	2	K3
c.	Discuss the importance of hospital infection control. Elaborate on the common sources and routes of transmission of hospital infections, and explain the objectives of an infection control committee.	3	K2
d.	Elaborate on the concept of hospital waste management. What are the essential control measures that must be implemented in hospital wards and operation theaters?	4	K2
e.	Describe the concept of health indicators and their role in evaluating health interventions. Write a detailed note on Disability-Adjusted Life Years (DALYs) and Quality-Adjusted Life Years (QALYs).	5	K2

SECTION C

3. Attempt any one part of the following:**10 x 1 = 10**

Q No.	Question	CO	Level
a.	Discuss the "natural history of disease" and describe the various "modes	1	K2

	of disease intervention" at different stages.		
b.	What are the key "indicators of health"? Explain the general "concept of disease causation" with relevant examples.	1	K2

4. Attempt any one part of the following: 10 x 1 = 10

Q No.	Question	CO	Level
a.	Outline the basic "methods in epidemiology." How do these methods help in understanding infectious disease epidemiology?	2	K2
b.	Describe the steps involved in the "investigation of an epidemic outbreak." How is epidemiological data sourced and utilized in this process?	2	K3

5. Attempt any one part of the following: 10 x 1 = 10

Q No.	Question	CO	Level
a.	Discuss the overall "importance" of monitoring hospital infection. Outline the essential practice areas of infection prevention for daily practice in a healthcare setting.	3	K3
b.	What are the core "principles of control of hospital infections"? Discuss the roles and objectives of an "infection control department."	3	K2

6. Attempt any one part of the following: 10 x 1 = 10

Q No.	Question	CO	Level
a.	Describe the fundamental relationship between "Environment and health". How do environmental factors directly impact the operations of public health systems?	4	K2
b.	Outline the basic steps and practical approach required for the "preparation of a healthcare waste management plan" in small and medium health care establishments.	4	K3

7. Attempt any one part of the following: 10 x 1 = 10

Q No.	Question	CO	Level
a.	Provide a detailed overview of the process involved in the "Evaluation of health interventions". Why is this evaluation necessary for the community?	5	K2
b.	Discuss the "Practical epidemiological considerations in the development of management of information." Why is managing this information crucial for evaluating health interventions?	5	K2
