

MBA
(SEM IV) THEORY EXAMINATION 2022-23
MANAGEMENT OF MANUFACTURING SYSTEM

Time: 3 Hours**Total Marks: 100****Note:** Attempt all sections. If require any missing data; then choose suitably.

SECTION A

1. Attempt all questions in brief.**2 x 10 = 20**

- (a) What is Product Focused Layout?
- (b) Explain Cellular Manufacturing System.
- (c) What is Job shop Manufacturing System?
- (d) Explain Computer Aided process planning.
- (e) What is RFID?
- (f) Explain Master Production Schedule.
- (g) What is ERP?
- (h) Explain 'Internal Customers'.
- (i) What is designed capacity?
- (j) What is Scrap?

SECTION B

2. Attempt the following:**15 x 2 = 30**

Case Study:

Flowerchem is a fertilizer manufacturing firm that makes mild fertilizers for bonsai plants, flower potted plants and small scale vegetable cultivation at home. The demand for fertilizer is high as Flowerchem is the only such manufacturer in North India and caters to a niche market. The raw materials are outsourced from North India and have number of good suppliers available.

In the last 6 months, there have been more than 10 machine breakdown in the packaging plant, boiler, furnace, pumps etc. This has happened often leading to production loss and a delay in order dispatch. When problems were further analyzed it was discovered that many machines are old and experience frequent breakdown. The workers are mostly production employees who have only working knowledge of machines and its inner mechanisms. When a machine fails, information is send to planning department who calls technicians and Engineers from outside to repair the machine. If some spare part is required it is either ordered by the company or supplied by the technician.

Answer any **two** of the following questions:

- (a) What are the fundamental Problems which company is facing?
- (b) How should the company manager's tackle these problems in short term?
- (c) What changes would you suggest in the working policy of the company for long term?

SECTION C

3. **Attempt any *one* part of the following:** **10 x 1 = 10**
- (a) Discuss the importance of manufacturing for technological and socioeconomic development.
 - (b) What is Plant Layout? Discuss factors affecting plant layout.
4. **Attempt any *one* part of the following:** **10 x 1 = 10**
- (a) What is Aggregate Planning? Discuss Aggregate Planning Strategies.
 - (b) Discuss Material Requirement Planning.
5. **Attempt any *one* part of the following:** **10 x 1 = 10**
- (a) What is Value chain? Describe its key components.
 - (b) Analyze the relationship between 'customer satisfaction' and 'manufacturing cost'. How can an organization identify the optimum balance between these two important aspects?
6. **Attempt any *one* part of the following:** **10 x 1 = 10**
- (a) What is capacity planning? Discuss capacity planning strategies.
 - (b) What is Productivity? Discuss factors affecting productivity and capacity expansion strategies.
7. **Attempt any *one* part of the following:** **10 x 1 = 10**
- (a) What is Maintenance Economics? Discuss Life cycle cost analysis.
 - (b) What is replacement policy? Also give reasons for replacement of equipment's.
